SKILLS

- Languages:** Python, C/C++, Bash, SQL, Solidity basics, PowerShell basics
- Frameworks:** HTML, Scapy, Flask, OWASP Top10
- Tools/Platforms:** Linux, Windows, AWS, MySQL, Burp Suite, Active Directory, Splunk, Git/GitHub, Docker, Remix IDE, Notion, Cursor AI, Antigravity AI, MCP
- Core Concepts:** Networking, Linux & Windows Internals, Web Application Pentesting, Cloud, DevOps, AI-Assisted Security Operations Centre, Digital Forensics, Blockchain, Operating Systems, Data Structure & Algorithm, Analytical Reasoning, DBMS
- Soft Skills:** Leadership, Analytical Thinking, Adaptability, Collaboration & Teamwork, Attention to Detail, Documentation & Reporting

INTERNSHIPS

Cyber Security Intern | [Techvanto](#)

Jun 2025 – Jul 2025

- Developed SmartNetIDS, a machine learning-based Network Intrusion Detection System for real-time anomaly detection and proactive identification of common cyber threats.
- Conducted security assessments and penetration testing on live projects, utilizing tools such as Nmap, Wireshark, and Metasploit to identify vulnerabilities in networks and web applications.
- Completed 60+ TryHackMe labs and gained hands-on experience in network security, web application security, and incident response, applying practical techniques to simulate and mitigate real-world attacks.

Cyber Security Intern | [Redynox-TheRedUsers](#)

Jun 2025 – Jun 2025

- Identified and exploited web application vulnerabilities, including SQL Injection, CSRF, and Clickjacking, using tools such as OWASP ZAP and WebGoat in controlled lab environments.
- Performed manual penetration testing and exploitation techniques to extract sensitive data, analyze anomalies, and assess application security posture.
- Strengthened expertise in the OWASP Top 10 security risks and applied mitigation strategies to improve secure development and vulnerability management practices.

PROJECTS

InsightOps | [Link](#)

Feb 2026 – Mar 2026

- Tech-Stack:** Splunk, Python, Flask, REST APIs, MITRE ATT&CK, Windows Server, Linux, KVM/QEMU
- Engineered an AI-assisted SOC intelligence system integrated with Splunk that transforms raw alerts into multi-stage incidents across Windows and Linux using MITRE ATT&CK-aligned detection logic.
- Formulated a deterministic risk-scoring model (0 - 100) and orchestrated a 6-stage Python pipeline (REST + HEC) to ingest, correlate, and enrich alerts with contextual explanations via a Flask monitoring interface.
- Optimized analyst triage by reducing alert noise by ~80 - 90% (20 - 30 alerts → 1 incident) and producing 12 + incidents (5 high-risk ≥ 75) with scores reaching 100 for multi-stage attack chains.

Secure File Management System | [Link](#)

Mar 2025 – Apr 2025

- Tech-Stack:** Python, Rich-CLI, Cryptography, 2-Factor Authentication, JWT
- Programmed a secure file management system with AES-256 encryption, 2FA, and integrated malware scanning for enhanced data protection.
- Secured with robust features, including secure session management, comprehensive logging, and file sharing with detailed file metadata.
- Implemented a Python-based solution ensuring secure user authentication, efficient file operations, and configurable security parameters.

CERTIFICATIONS

- Security+ Certified | [CompTIA](#) Apr 2026
- Certified Blue Team Practitioner (CBTP) | [SecOps Group](#) Mar 2026
- Quick Heal Certified Digital Forensics Investigator (QHDFI) | [QuickHeal](#) Mar 2026
- Certified Network Security Practitioner (CNSP) | [SecOps Group](#) Feb 2026
- Network+ Certified | [CompTIA](#) Jan 2025

ACHIEVEMENTS

- Maintain technical blogs covering Labs, CTFs, project breakdowns, and practical learning experiences | [Medium](#) Since Apr 2025
- Ranking Top 2% Globally | [TryHackMe](#) Since Jan 2024
- Solved 500+ programming problems across all online coding platforms and courses | [Codolio](#) | [NeoColab](#) Apr 2026
- Participated in 15+ CTF events at the University, National, and international levels | [CTF](#) Apr 2026

EDUCATION

Lovely Professional University

Punjab, India

Bachelor of Technology (Hons.) - CSE with specialization in Cybersecurity and Blockchain | CGPA: 8.70

Since Aug 2023

Kendriya Vidyalaya 3 Base Repair Depot, Air Force Station

Chandigarh, India

Intermediate - PCM with Computer Science | Percentage: 86

Apr 2022 – Mar 2023

High School - CBSE | Percentage: 93.6

May 2020 – Apr 2021
